EDUCATION

UNIVERSITY OF WASHINGTON BOTHELL

Bothell, WA

Bachelor of Science in Computer Science and Software Engineering, Cumulative GPA: 3.4/4

June 2024

- Relevant Coursework: Artificial Intelligence, Machine Learning, Deep Learning, Automation, Robotics, Robot Perception

UNIVERSITY PROJECTS

AI Brain Tumor Detection System

Feb 2021 – May 2021

- Built an automated system to analyze 369 MRI brain scans using deep learning, achieving high accuracy in identifying tumor boundaries.
- Optimized cloud storage integration to speed up scan retrieval by 26%, ensuring faster processing times.
- Attained multi-class segmentation performance metrics of 0.83 Dice and 0.76 IoU through rigorous U-Net model training.

Stock Market Forecasting Tool

Jan 2024 – Ongoing

- Developed a data pipeline that reduced analysis time by 84% for large financial datasets, enabling daily automated stock predictions.
- Improved forecasting accuracy by 45% using advanced machine learning models to identify profitable investment trends.

Automated Image Recognition Platform

Jan 2024 – Apr 2024

- Trained an image recognition model to achieve 94% accuracy in identifying various objects using cloud-based data processing.
- Created detailed data visualizations to communicate model performance and insights to non-technical stakeholders.

WORK EXPERIENCE

UNDERGRADUATE RESEARCH ASSISTANT

UNIVERSITY OF WASHINGTON BOTHELL

Jan 2024 – Jun 2024

- Designed and built machine learning systems to process complex, multi-dimensional data for research purposes.
- Presented research findings at university conferences, effectively explaining technical concepts to diverse audiences.

DATA ANALYST, EXECUTIVE ASSISTANT

WAYNE'S 45S VINYL

Jun 2024 – Ongoing

- Leads business logistics and digital strategy, including website management, inventory control, and IT solution deployment.
- Manages high-value procurement and sales, overseeing transactions totaling over \$50,000.

TECHNICAL SKILLS

IT & Systems: CompTIA A+ Certified, Microsoft 365, Windows, Linux

Languages: Python, C/C++, SQL, Bash/Shell, Powershell

ML Frameworks: TensorFlow, PyTorch, Scikit-learn, Matplotlib, DeepSpeed, ONNX,

DevOps & Tools: Git, Linux/Unix, Docker, Kubernetes, Helm, Hadoop, TensorBoard

Databases & Cloud: MySQL, MongoDB, GCP (Compute Engine, Cloud Functions, Vertex AI), AWS
